Email Threats

Presented by Darryl Higa
University of Hawai‘i Information Technology Services

Watch LIVE demonstrations that highlight the latest tactics used by cybercriminals to access your online accounts, steal your personal information, and take your money. Learn how to protect yourself and your organization from these security threats that often start off as an innocent-looking email message.

156 million phishing emails sent DAILY

16 million make it through email filters

8 million emails are opened

800K links are clicked

80K people are scammed DAILY

...including victims at JABSOM and Cancer Center
